HIDDEN REALITIES

PHOTOGRAPHY EXHIBITION

Opening Sunday 11 October 2pm Runs till Tuesday 3 November. 2015

In this particular series Hidden Realities the vision was to create vibrant, layered psychedelic photographic images, which are an invitation to explore the mysterious realm within nature and possibilities within our individual realities. Intended to reveal the hidden beauties. Using images of natural forms around me and digital manipulation I wanted to create an invitation into mystery and place it on a wall as a window or a space, for viewers to engage in. Mounted on canvas blocks of varying size with black frames, the window is contained and something to enter in to, a place where the imagination can run free. A gateway leading to another world.
